## Memorandum

Date: May 28, 2014  
To: Operational Personnel, San Antonio Air Traffic Control Tower  
From: Ron Lozano,  
Support Manager, San Antonio Air Traffic Control Tower  
Subject: 14-092 New Routings for Cancelled HUBEE 2 Departures

---

As a reminder, the HUBEE 2 Departure is cancelled as of Thursday May 29<sup>th</sup>. Some new sample routings to a few major airports are shown below.

Due to the transition to Data Comm, the new routes must begin at a fix (Churn) within the SAT airspace. SAT VORTAC cannot be used because aircraft departing from RND or BAZ would receive erroneous routings and affect ZHU's conflict resolution software. And since Churn is not published on J138, the initial routing is V198. J2 is also unusable because it conflicts with the Rodio RNAV STAR. A new eastbound SID is currently in the works which could be available in January 2015.

### SAMPLE ROUTINGS:

*make sure data cards are up to date.*
